#### **Investment Objective and Policy**

Babson Capital Corporate Investors (the "Trust") is a closed-end management investment company, first offered to the public in 1971, whose shares are traded on the New York Stock Exchange under the trading symbol "MCI". The Trust's share price can be found in the financial section of most newspapers under either the New York Stock Exchange listings or Closed-End Fund Listings.

The Trust's investment objective is to maintain a portfolio of securities providing a fixed yield and at the same time offering an opportunity for capital gains. The Trust's principal investments are privately placed, below-investment grade, longterm debt obligations with equity features such as common stock, warrants, conversion rights, or other equity features and, occasionally, preferred stocks. The Trust typically purchases these investments, which are not publicly tradable, directly from their issuers in private placement transactions. These investments are typically mezzanine debt instruments with accompanying private equity securities made to small or middle market companies. In addition, the Trust may invest, subject to certain limitations, in marketable investment grade debt securities, other marketable debt securities (including high yield securities) and marketable common stocks. Below-investment grade or high yield securities have predominantly speculative characteristics with respect to the capacity of the issuer to pay interest and repay principal.

Babson Capital Management LLC ("Babson Capital") manages the Trust on a total return basis. The Trust distributes substantially all of its net income to shareholders each year. Accordingly, the Trust pays dividends to shareholders in January, May, August, and November. The Trust pays dividends to its shareholders in cash, unless the shareholder elects to participate in the Dividend Reinvestment and Share Purchase Plan.

#### Form N-Q

The Trust files its complete schedule of portfolio holdings with the U.S. Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. This information is available (i) on the SEC's website at http:// www.sec.gov; and (ii) at the SEC's Public Reference Room in Washington, DC (which information on their operation may be obtained by calling 1-800-SEC-0330). A complete schedule of portfolio holdings as of each quarter-end is available upon request by calling, toll-free, 866-399-1516.

#### **Proxy Voting Policies & Procedures; Proxy Voting Record**

The Trustees of the Trust have delegated proxy voting responsibilities relating to the voting of securities held by the Trust to Babson Capital. A description of Babson Capital's proxy voting policies and procedures is available (1) without charge, upon request, by calling, toll-free 866-399-1516; (2) on the Trust's website: http://www.babsoncapital.com/mci; and (3) on the SEC's website at http://www.sec.gov. Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) on the Trust's website: http://www.babsoncapital.com/mci; and (2) on the SEC's website at http://www.babsoncapital.com/mci; and (2) on the SEC's website at http://www.babsoncapital.com/mci; and (2) on the SEC's website at http://www.sec.gov.

## **TO OUR SHAREHOLDERS**

#### April 30, 2014

We are pleased to present the March 31, 2014 Quarterly Report of Babson Capital Corporate Investors (the "Trust").

The Board of Trustees declared a quarterly dividend of \$0.30 per share, payable on May 9, 2014 to shareholders of record on April 28, 2014. The Trust also paid a \$0.30 per share dividend for the preceding quarter. The Trust earned \$0.31 per share of net investment income for the first quarter of 2014, of which approximately \$0.06 per share represented income due to nonrecurring items, compared to \$0.30 per share in the previous quarter, of which approximately \$0.04 per share represented income due to nonrecurring items.

During the first quarter, the net assets of the Trust increased to \$277,298,835 or \$14.27 per share compared to \$268,687,514 or \$13.85 per share on December 31, 2013. This translates into a 3.0% total return for the quarter, based on the change in the Trust's net assets assuming the reinvestment of all dividends. Longer term, the Trust returned 11.5%, 13.7%, 16.4%, 12.9%, and 13.4% for the 1-, 3-, 5-, 10-, and 25-year time periods, respectively, based on the change in the Trust's net assets assuming the reinvestment of all dividends.

The Trust's share price increased 1.6% during the quarter, from \$14.93 per share as of December 31, 2013 to \$15.17 per share as of March 31, 2014. The Trust's market price of \$15.17 per share equates to a 6.3% premium over the March 31, 2014 net asset value per share of \$14.27. The Trust's average quarter-end premium for the 3, 5 and 10-year periods was 19.8%, 13.9% and 12.8%, respectively. U.S. equity markets, as approximated by the Russell 2000 Index, increased 1.1% for the quarter. U.S. fixed income markets, as approximated by the Barclays Capital U.S. Corporate High Yield Index, increased 3.0% for the quarter.

Middle market merger and acquisition activity was once again slow during the first quarter of 2014. Despite this, investment activity for the Trust was strong, with five new private placement investments closed in the first quarter. The five new investments were in GenNx Novel Holding, Inc., GTI Holding Company, Hartland Controls Holding Corporation, HHI Group, LLC and VP Holding Company. A brief description of these investments can be found in the Consolidated Schedule of Investments. The total amount invested by the Trust in these transactions was \$13,618,000. This amount represents a slight increase from the \$13,406,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the fourth quarter of 2013, but a 142% increase from the \$5,631,000 invested by the Trust in the first quarter of 2013. We are off to a good start for the year and our deal pipeline is currently robust. Competition for new investments continues to be intense though, as there continues to be an overabundance of private debt and equity capital available to be invested. Attractive companies are being aggressively pursued by buyers and lenders alike, pushing purchase prices and leverage multiples continually higher, approaching levels not seen since 2007. Though we are actively closing new deals, we are doing so cautiously and with discipline, consistent with our longstanding investment philosophy of taking prudent levels of risk and getting paid appropriately for the risk taken. For example, the average total leverage profi

The condition of the Trust's existing portfolio remained solid through the first quarter. Sales and earnings for the Trust's portfolio as a whole continued their upward momentum. Credit upgrades during the quarter outnumbered credit downgrades by a two to one margin. The number of companies on our watch list and in default continues to be at or near the lowest level we have seen over the last five years. This investment resulted in a loss for the Trust though, as the company had been struggling financially for quite some time. We have a large backlog of portfolio companies that are in the process of being sold, with closings expected this year. We had five portfolio companies fully or partially prepay their debt instruments held by the Trust during the first quarter. This relatively low level of prepayment activity is welcome after the unprecedented levels of prepayments we experienced in 2013, when 32 of the Trust's portfolio companies fully or partially prepaid their debt obligations to the Trust.

While the Trust was able to maintain its \$0.30 per share quarterly dividend in the first quarter, this level may not be sustainable for the rest of 2014. Excluding income from non-recurring items, the Trust's current earnings are less than the dividend rate. Earning are down due principally to the considerable reduction in the number of higher-yielding private debt securities in the portfolio resulting from the high level of prepayment and exit activity that occurred in 2012 and 2013. We were not able to offset this with new investments due to the highly competitive market conditions and the slow merger and acquisition market that have existed for most of the past few years. While first quarter 2014 investment activity was strong, we do expect a higher than normal level of exit activity in the portfolio for the rest of 2014. It is therefore unlikely that we can build the portfolio back up to its former size in the near term. As we move through 2014, we and the Board of Trustees will continue to evaluate the earnings capacity of the Trust and seek to formulate a dividend strategy that is consistent with that earnings level.

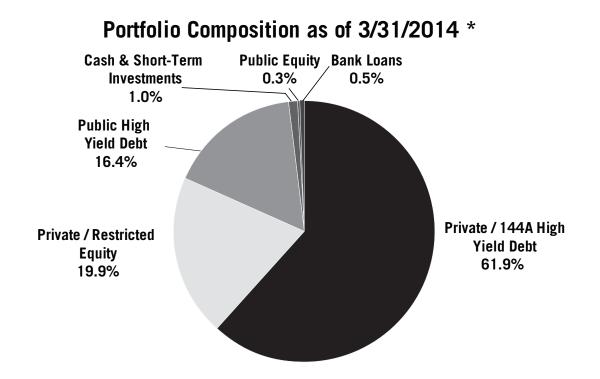

Thank you for your continued interest in and support of Babson Capital Corporate Investors.

Sincerely,

Well I. Iday

Michael L. Klofas

President

(a) Per share amounts were adjusted to reflect a 2:1 stock split effective February 18, 2011.
(b) Calculated using average shares.
(c) Rounds to less than \$0.01 per share.
(d) Net asset value return represents portfolio returns based on change in the Trust's net asset value assuming the reinvestment of all dividends and distributions which differs from the total investment return based on the Trust's market value due to the difference between the Trust's net asset value and the market value of its shares outstanding; past performance is no guarantee of future results.
(e) As additional information, this ratio is included to reflect the taxes paid on retained long-term gains. These taxes paid are netted against realized capital gains in the Statement of Operations. The taxes paid are treated as deemed distributions and a credit for the taxes paid is passed on to the shareholders.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## (Unaudited)

## 1. History

Babson Capital Corporate Investors (the "Trust") commenced operations in 1971 as a Delaware corporation. Pursuant to an Agreement and Plan of Reorganization dated November 14, 1985, approved by shareholders, the Trust was reorganized as a Massachusetts business trust under the laws of the Commonwealth of Massachusetts, effective November 28, 1985.

The Trust is a diversified closed-end management investment company. Babson Capital Management LLC ("Babson Capital"), a wholly-owned indirect subsidiary of Massachusetts Mutual Life Insurance Company ("MassMutual"), acts as its investment adviser. The Trust's investment objective is to maintain a portfolio of securities providing a fixed yield and at the same time offering an opportunity for capital gains. The Trust's principal investments are privately placed, belowinvestment grade, long-term debt obligations. Such direct placement securities may, in some cases, be accompanied by equity features such as common stock, warrants, conversion rights, or other equity features and, occasionally, preferred stocks. The Trust typically purchases these investments, which are not publicly tradable, directly from their issuers in private placement transactions. These investments are typically mezzanine debt instruments with accompanying private equity securities made to small or middle market companies. In addition, the Trust may invest, subject to certain limitations, in marketable investment grade debt securities, other marketable debt securities (including high yield securities) and marketable common stocks. Below-investment grade or high yield securities have predominantly speculative characteristics with respect to the capacity of the issuer to pay interest and repay capital.

On January 27, 1998, the Board of Trustees authorized the formation of a wholly-owned subsidiary of the Trust ("CI Subsidiary Trust") for the purpose of holding certain investments. The results of CI Subsidiary Trust are consolidated in the accompanying financial statements. Footnote 2.D below discusses the Federal tax consequences of the CI Subsidiary Trust.

## 2. Significant Accounting Policies

The following is a summary of significant accounting policies followed consistently by the Trust in the preparation of its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP").

## A. Fair Value Measurements:

Under U.S. GAAP, fair value represents the price that should be received to sell an asset (exit price) in an orderly transaction between willing market participants at the measurement date.

## Determination of Fair Value

The determination of the fair value of the Trust's investments is the responsibility of the Trust's Board of Trustees (the "Trustees"). The Trustees have adopted procedures for the valuation of the Trust's securities and has delegated responsibility for applying those procedures to Babson Capital. Babson Capital has established a Pricing Committee which is responsible for setting the guidelines used in following the procedures adopted by the Trustees and ensuring that those guidelines are being followed. Babson Capital considers all relevant factors that are reasonably available, through either public information or information directly available to Babson Capital, when determining the fair value of a security. The Trustees meet at least once each quarter to approve the value of the Trust's portfolio securities as of the close of business on the last business day of the preceding quarter. This valuation requires the approval of a majority of the Trustees of the Trust, including a majority of the Trustees who are not interested persons of the Trust or of Babson Capital. In approving valuations, the Trustees will consider reports by Babson Capital analyzing each portfolio security in accordance with the procedures and guidelines referred to above, which include the relevant factors referred to below. Babson Capital has agreed to provide such reports to the Trust at least quarterly. The consolidated financial statements include private placement restricted securities valued at \$200,831,121 (72.43% of net assets) as of March 31, 2014 whose values have been estimated by the Trustees based on the process described above in the absence of readily ascertainable market values. Due to the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

Following is a description of valuation methodologies used for assets recorded at fair value.

## Corporate Public Securities – Corporate Bonds, Preferred Stocks and Common Stocks

The Trust uses external independent third-party pricing services to determine the fair values of its Corporate Public Securities. At March 31, 2014, 100% of the carrying value of these investments was from external pricing services. In the event that the primary pricing service does not provide a price, the Trust utilizes the pricing provided by a secondary pricing service.

Public debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Trust's pricing services use multiple valuation techniques to determine fair value. In instances where significant market activity exists, the pricing services may utilize a market based approach through which quotes from market makers are used to determine fair value. In instances where significant market activity may not exist or is limited, the pricing services also utilize proprietary valuation models which may consider market characteristics such as benchmark yield curves, option adjusted spreads, credit

## **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (CONTINUED) (Unaudited)

spreads, estimated default rates, coupon rates, anticipated timing of principal underlying prepayments, collateral, and other unique security features in order to estimate the relevant cash flows, which are then discounted to calculate the fair value.

The Trust's investments in bank loans are normally valued at the bid quotation obtained from dealers in loans by an independent pricing service in accordance with the Trust's valuation policies and procedures approved by the Trustees.

Public equity securities listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sales price of that day.

Annually, Babson Capital conducts reviews of the primary pricing vendors to validate that the inputs used in that vendors' pricing process are deemed to be market observable as defined in the standard. While Babson Capital is not provided access to proprietary models of the vendors, the reviews have included on-site walk-throughs of the pricing process, methodologies and control procedures for each asset class and level for which prices are provided. The review also includes an examination of the underlying inputs and assumptions for a sample of individual securities across asset classes, credit rating levels and various durations, a process Babson Capital continues to perform annually. In addition, the pricing vendors have an established challenge process in place for all security valuations, which facilitates identification and resolution of prices that fall outside expected ranges. Babson Capital believes that the prices received from the pricing vendors are representative of prices that would be received to sell the assets at the measurement date (exit prices) and are classified appropriately in the hierarchy.

#### **Corporate Restricted Securities – Corporate Bonds**

The fair value of certain notes is determined using an internal model that discounts the anticipated cash flows of those notes using a specific discount rate. Changes to that discount rate are driven by changes in general interest rates, probabilities of default and credit adjustments. The discount rate used within the models to discount the future anticipated cash flows is considered a significant unobservable input. Significant increases/(decreases) in the discount rate would result in a significant (decrease)/increase to the notes' fair value.

The fair value of certain distressed notes is based on an enterprise waterfall methodology which is discussed in the equity security valuation section below.

### Corporate Restricted Securities – Common Stock, Preferred Stock and Partnerships & LLC's

The fair value of equity securities is determined using an enterprise waterfall methodology. Under this methodology, the enterprise value of the company is first estimated and that value is then allocated to the company's outstanding debt and equity securities based on the documented priority of each class of securities in the capital structure. Generally, the waterfall proceeds from senior debt tranches of the capital structure to senior then junior subordinated debt, followed by each class of preferred stock and finally the common stock.

To estimate a company's enterprise value, the company's trailing twelve months earnings before interest, taxes, depreciation and amortization ("EBITDA") is multiplied by a valuation multiple. A discount for lack of marketability is applied to the end result.

Both the company's EBITDA and valuation multiple are considered significant unobservable inputs.

#### **Short-Term Securities**

Short-term securities, of sufficient credit quality, with more than sixty days to maturity are valued at fair value, using external independent third-party services. Short-term securities having a maturity of sixty days or less are valued at amortized cost, which approximates fair value.

# Quantitative Information about Level 3 Fair Value Measurements

The following table represents quantitative information about Level 3 fair value measurements as of March 31, 2014.

	Valuation Technique	Unobservable Inputs	Range	Weighted Average
Corporate Bonds	Discounted Cash Flows	Discount Rate	7.0% to 17.4%	13.9%
Equity Securities	Market Approach	Valuation Multiple	3.5x to 10.8x	7.0x
		Discount for lack of marketability	0% to 25%	5.4%
		EBITDA	\$0.2 million to \$143.2 million	n \$23.0 million

#### Fair Values Hierarchy

The Trust categorizes its investments measured at fair value in three levels, based on the inputs and assumptions used to determine fair value. These levels are as follows:

Level 1 - quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Trust's own assumptions in determining the fair value of investments)

## **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (CONTINUED) (Unaudited)

Interest (Amortization)	\$	183,735	-	
Net realized gain on investments before taxes	\$	518,783	-	
Net change in unrealized depreciation of investments before taxes.	\$	(120,684)	1,460,538	

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) (Unaudited)

#### B. Accounting for Investments:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis, including the amortization of premiums and accretion of discounts on bonds held using the yield-to-maturity method. The Trust does not accrue income when payment is delinquent and when management believes payment is questionable.

Realized gains and losses on investment transactions and unrealized appreciation and depreciation of investments are reported for financial statement and Federal income tax purposes on the identified cost method.

#### C. Use of Estimates:

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### D. Federal Income Taxes:

The Trust has elected to be taxed as a "regulated investment company" under the Internal Revenue Code, and intends to maintain this qualification and to distribute substantially all of its net taxable income to its shareholders. In any year when net long-term capital gains are realized by the Trust, management, after evaluating the prevailing economic conditions, will recommend that the Trustees either designate the net realized long-term gains as undistributed and pay the Federal capital gains taxes thereon or distribute all or a portion of such net gains. For the three months ended March 31, 2014, the Trust did not have any realized taxable long-term capital gains.

The Trust is taxed as a regulated investment company and is therefore limited as to the amount of non-qualified income that it may receive as the result of operating a trade or business, e.g. the Trust's pro rata share of income allocable to the Trust by a partnership operating company. The Trust's violation of this limitation could result in the loss of its status as a regulated investment company, thereby subjecting all of its net income and capital gains to corporate taxes prior to distribution to its shareholders. The Trust, from time-to-time, identifies investment opportunities in the securities of entities that could cause such trade or business income to be allocable to the Trust. The CI Subsidiary Trust (described in Footnote 1 above) was formed in order to allow investment in such securities without adversely affecting the Trust's status as a regulated investment company.

The CI Subsidiary Trust is not taxed as a regulated investment company. Accordingly, prior to the Trust receiving any

distributions from the CI Subsidiary Trust, all of the CI Subsidiary Trust's taxable income and realized gains, including non-qualified income and realized gains, is subject to taxation at prevailing corporate tax rates. As of March 31, 2014, the CI Subsidiary Trust has incurred income tax expense of \$552.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of the existing assets and liabilities and their respective tax basis. As of March 31, 2014, the CI Subsidiary Trust has a deferred tax liability of \$1,516,326.

The Trust recognizes a tax benefit from an uncertain position only if it is more likely than not that the position is sustainable, based solely on its technical merits and consideration of the relevant taxing authority's widely understood administrative practices and precedents. If this threshold is met, the Trust measures the tax benefit as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. The Trust has evaluated and determined that the tax positions did not have a material effect on the Trust's financial position and results of operations for the three months ended March 31, 2014.

#### E. Distributions to Shareholders:

The Trust records distributions to shareholders from net investment income and net realized gains, if any, on the ex-dividend date. The Trust's net investment income dividend is declared four times per year, in April, July, October, and December. The Trust's net realized capital gain distribution, if any, is declared in December.

## **3. Investment Services Contract**

#### A. Services:

Under an Investment Services Contract (the "Contract") with the Trust, Babson Capital agrees to use its best efforts to present to the Trust a continuing and suitable investment program consistent with the investment objectives and policies of the Trust. Babson Capital represents the Trust in any negotiations with issuers, investment banking firms, securities brokers or dealers and other institutions or investors relating to the Trust's investments. Under the Contract, Babson Capital also provides administration of the day-to-day operations of the Trust and provides the Trust with office space and office equipment, accounting and bookkeeping services, and necessary executive, clerical and secretarial personnel for the performance of the foregoing services.

#### B. Fee:

For its services under the Contract, Babson Capital is paid a quarterly investment advisory fee of 0.3125% of the net asset value of the Trust as of the last business day of each fiscal quarter, which is approximately equal to 1.25% annually. A majority of the Trustees, including a majority of the Trustees who are not interested persons of the Trust or of Babson Capital, approve the valuation of the Trust's net assets as of such day.

## **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (CONTINUED)

## (Unaudited)

## 4. Senior Secured Indebtedness

MassMutual holds the Trust's \$30,000,000 Senior Fixed Rate Convertible Note (the "Note") issued by the Trust on November 15, 2007. The Note is due November 15, 2017 and accrues interest at 5.28% per annum. MassMutual, at its option, can convert the principal amount of the Note into common shares. The dollar amount of principal would be converted into an equivalent dollar amount of common shares based upon the average price of the common shares for ten business days prior to the notice of conversion. For the three months ended March 31, 2014, the Trust incurred total interest expense on the Note of \$396,000.

The Trust may redeem the Note, in whole or in part, at the principal amount proposed to be redeemed together with the accrued and unpaid interest thereon through the redemption date plus a Make Whole Premium. The Make Whole Premium equals the excess of (i) the present value of the scheduled payments of principal and interest which the Trust would have paid but for the proposed redemption, discounted at the rate of interest of U.S. Treasury obligations whose maturity approximates that of the Note plus 0.50% over (ii) the principal of the Note proposed to be redeemed.

7,166,832

The aggregate cost of investments is substantially the same for financial reporting and Federal income tax purposes as of March 31, 2014. The net unrealized appreciation of investments for financial reporting and Federal tax purposes as of March 31, 2014 is \$3,020,132 and consists of \$35,679,668 appreciation and \$32,659,536 depreciation.

Net unrealized appreciation of investments on the Statement of Assets and Liabilities reflects the balance net of a deferred tax accrual of \$1,516,326 on net unrealized gains on the CI Subsidiary Trust.

## **DIVIDEND REINVESTMENT AND SHARE PURCHASE PLAN**

Babson Capital Corporate Investors (the "Trust") offers a Dividend Reinvestment and Share Purchase Plan (the "Plan"). The Plan provides a simple way for shareholders to add to their holdings in the Trust through the receipt of dividend shares issued by the Trust or through the investment of cash dividends in Trust shares purchased in the open market. A shareholder may join the Plan by filling out and mailing an authorization card to DST Systems, Inc., the Transfer Agent.

Participating shareholders will continue to participate until they notify the Transfer Agent, in writing, of their desire to terminate participation. Unless a shareholder elects to participate in the Plan, he or she will, in effect, have elected to receive dividends and distributions in cash. Participating shareholders may also make additional contributions to the Plan from their own funds. Such contributions may be made by personal check or other means in an amount not less than \$10 nor more than \$5,000 per quarter. Cash contributions must be received by the Transfer Agent at least five days (but no more then 30 days) before the payment date of a dividend or distribution.

Whenever the Trust declares a dividend payable in cash or shares, the Transfer Agent, acting on behalf of each participating shareholder, will take the dividend in shares only if the net asset value is lower than the market price plus an estimated brokerage commission as of the close of business on the valuation day. The valuation day is the last day preceding the day of dividend payment.

When the dividend is to be taken in shares, the number of shares to be received is determined by dividing the cash dividend by the net asset value as of the close of business on the valuation date or, if greater than net asset value, 95% of the closing share price. If the net asset value of the shares is higher than the market value plus an estimated commission, the Transfer Agent, consistent with obtaining the best price and execution, will buy shares on the open market at current prices promptly after the dividend payment date.

The reinvestment of dividends does not, in any way, relieve participating shareholders of any federal, state or local tax. For federal income tax purposes, the amount reportable in respect of a dividend received in newly-issued shares of the Trust will be the fair market value of the shares received, which will be reportable as ordinary income and/or capital gains.

As compensation for its services, the Transfer Agent receives a fee of 5% of any dividend and cash contribution (in no event in excess of \$2.50 per distribution per shareholder.)

Any questions regarding the Plan should be addressed to DST Systems, Inc., Transfer Agent for Babson Capital Corporate Investors' Dividend Reinvestment and Share Purchase Plan, P.O. Box 219086, Kansas City, MO 64121-9086.
