OCTOBER 2019 / FACTSHEET

OBJECTIVE

The Barings Multi Asset Fund ("The Fund") aims to generate a return in excess of UK inflation over a three year period.

STRATEGY

Dynamic top down approach to asset allocation implemented using active and passive building blocks

MARKET OPPORTUNITY

- Targeting equity like returns with less risk than global equities
- Understanding risk and diversification – recognizing changing correlations and risk characteristics
- Simple building blocks – a transparent, disciplined and proven process with strong risk controls
- Highly experienced team managing targeted return strategies since 2002

Key Risks:

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets
- Debt securities are subject to risks that the issuer will not meet its payment obligations (ie, default). Low rated (high yield) or equivalent unrated debt securities of the type in which the fund will invest generally offer a higher return than higher rated debt securities, but also are subject to greater risks that the issuer will default.
