Barings UK Unit Trusts

Introduction

These Interim Reports and Unaudited Financial Statements cover the period from 1 September 2020 to 28 February 2021 and review the performance and market outlook for seven of the unit trusts managed by Baring Fund Managers Limited ("the Manager"). These comprise the Barings Dynamic Capital Growth Fund, the Barings Eastern Trust, the Barings European Growth Trust, the Barings Europe Select Trust, the Barings German Growth Trust, the Barings Japan Growth Trust and the Barings Strategic Bond Fund ("the Trusts").

Baring Asset Management Limited is the Investment Manager for the Trusts.

The functional and presentational currency for all the Trusts is Sterling except for the Barings German Growth Trust where the functional and presentational currency is Euros.

As an investor in one of the Trusts, your money is pooled with that of other investors in the same Trust and invested by the Manager in line with the Investment Objective of the particular trust.

The Barings Dynamic Capital Growth Fund closed on 3 December 2019, therefore the financial statements for this Fund have been produced on a basis other than Going Concern for the current period. The financial statements for the other Trusts have been produced on a Going Concern basis.

For further information about the Trusts please visit the Barings website, www.barings.com.

Trusts Available in Hong Kong

Warning: In relation to the trusts as set out in this interim report, only the following trusts are authorised by the Securities and Futures Commission ("**SFC**") pursuant to Section 104 of the Securities and Futures Ordinance of Hong Kong ("**SFO**") and hence may be offered to the public of Hong Kong:

- Barings Europe Select Trust
- · Barings Eastern Trust
- Barings European Growth Trust
- Barings German Growth Trust

The SFC's authorisation is not a recommendation or endorsement of a scheme nor does it guarantee the commercial merits of a scheme or its performance. It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

Please note that this interim financial report is a global document and therefore also contains information of the following trusts which are not authorised by the SFC in Hong Kong and not available to the public in Hong Kong.

- Barings Dynamic Capital Growth Fund
- · Barings Japan Growth Trust
- · Barings Strategic Bond Fund

No offer shall be made to the public of Hong Kong in respect of the above unauthorised trusts and unauthorised collective investment schemes.

COVID-19

The spread of COVID-19 around the world in 2020 has caused significant volatility in international markets. There is still uncertainty around the breadth and duration of business disruptions related to COVID-19, as well as its impact on the international economies and, as such, the Manager is actively monitoring the extent of the impact to its operations, financial accounting and reporting.

Investment Objective and Policy and Fund at a Glance

Fund Closure

Following a review of the Fund, the Directors resolved on 22 May 2019 to terminate the Barings Dynamic Capital Growth Fund and unitholders were offered a Scheme of Election to switch their holding into the Barings Multi Asset Fund. Any units which were not switched were redeemed on 3 December 2019, the closing date of the Fund and proceeds were returned to the unitholders.

Investment Objective and Policy

The investment objective of Barings Dynamic Capital Growth Fund (the "Fund") was to achieve capital growth by investing globally.

In order to achieve this objective, the Fund invested directly and indirectly across a range of asset classes, such as equities and equity-related securities, fixed income, currencies, deposits, cash and money market instruments. Exposure might be gained indirectly to alternative investments.

In order to implement the investment policy, the Fund gained exposure through transferable securities, or collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager). It also used derivatives including futures, options, warrants, swaps and forward contracts for efficient portfolio management and for investment purposes.

Please refer to the Prospectus for the full investment objective and policy.

Performance Assessment

The Fund was not managed to a benchmark, nor did the Manager use a benchmark in assessing the Fund's performance. Investors may however refer to the information in the Morningstar's GBP Flexible Allocation Category which presents data for a range of funds (including the Fund) which are grouped according to investment style, including performance information, and which enables investors to compare information across products.

How the Fund was Managed

The Manager used the ideas generated by the Strategic Policy Group, our global macro research asset allocation group, to choose what we believed were the best investments to achieve the investment objectives of the Fund. This means we constructed a portfolio of stocks or bonds from a mix of companies, countries and sectors to suit our asset allocation policy at that point in time.

We believed that asset allocation was the most important driver of returns. It was important to be in the right market at the right time, and to be able to retreat to a more defensive position to help manage risk. We followed a two-stage investment process that assessed both long-term return opportunities, driven by slowly evolving macroeconomic factors, and shorter-term opportunities generated by market volatility. We maintained a forward–looking approach and were conscious that what proved to be a defensive asset in a previous downturn may not always be suitable. We used our wide investment universe to ensure that we avoided over diversification and focused on assets that we believed were appropriate for the prevailing economic and market cycle.

Risk Profile

Please see detailed below the key risks applicable to the Fund:

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- The rating of a bond is subject to change. There is no guarantee that a bond issuer will pay the interest due or repay the loan, which would result in a loss of income to the Fund, along with its initial investment. Bond values are likely to fall if interest rates rise.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative, as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.

Investment Objective and Policy and Fund at a Glance (continued)

Risk Profile (continued)

• Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

The Fund at a Glance on 28 February 2021

^{*} The Fund ceased trading on 3 December 2019 and the Fund value as at 2 December 2019 was £21.72 million.

The Fund ceased trading and were fully redeemed on 3 December 2019. So there have been no prices available after 2 December 2019.

^{**} The Ongoing Charge Figure ("OCF") reflects the payments and expenses which cover aspects of operating the Fund and is deducted from the assets over the period. It includes fees paid for the investment management, trustee and general charges.

^{***} Class D units were only available for subscription by certain distributors who had in place a placing agency agreement or distribution agreement with the Manager or the Investment Manager or their delegates or otherwise at the discretion of the Manager.

^{*}The Fund's last trading date was 3 December 2019 and prices were only available for the period from 1 September 2019 to 3 December 2019.

^{***}High/low prices included in the table above were for prior accounting year from 1 September 2019 to 31 August 2020 and accounting period from 16 February 2019 to 31 August 2019, respectively.

^{**}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Fund and unit class returns before operating charges.

^{*}The Fund's last trading date was 3 December 2019 and prices were only available for the period from 1 September 2019 to 3 December 2019.

^{**}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Fund and unit class returns before operating charges.

^{***}High/low prices included in the table above were for prior accounting year from 1 September 2019 to 31 August 2020 and accounting period from 16 February 2019 to 31 August 2019, respectively.

Report of the Investment Manager

Clients of the Fund received a notification on the 10th of September 2019 regarding the Fund liquidation with the option to 'switch' to hold new shares in the Barings Multi Asset Fund (Elected Fund) upon Fund liquidation. The Fund liquidation and the 'switch' took place on the 3rd December 2019. This was not a merger.

Directors' Statement

The financial statements on pages 11 and 12 were approved by Baring Fund Managers Limited (the "Manager") and signed on its behalf by:

Richer Kon Director R. KENT

J. SWAYNE Director London 27 April 2021

Barings Dynamic Capital Growth Fund Portfolio Statement

as at 28 February 2021

The Fund ceased investment activity on 3 December 2019. The Fund had nil investments for the period ended 28 February 2021 and year ended 31 August 2020.

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a basis other than going concern following the Directors' resolution on 22 May 2019 to terminate the Barings Dynamic Capital Growth Fund (the "Fund"). Any additional costs in relation to the termination will be borne by the Manager. In applying this basis of preparation, the assets and liabilities of the Fund continue to be stated at their fair values, which materially equate to their realisable values and fixed assets and long-term liabilities are reclassified as current assets and liabilities.

2	Nil	Nil	Nil	1.3826

^{*} No distribution as the Fund ceased trading on 3 December 2019.

Investment Objective and Policy and Trust at a Glance

Investment Objective and Policy

The investment objective of Barings Eastern Trust (the "Trust") is to achieve capital growth by investing in the Asia Pacific region excluding Japan.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in the Asia Pacific region excluding Japan, or quoted or traded on the stock exchanges in those countries, including developed and emerging markets.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities of companies outside of the Asia Pacific region excluding Japan, as well as in fixed income and cash.

In order to implement the investment policy, the Trust may gain indirect exposure through American Depositary Receipts, Global Depositary Receipts and other equity-related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

Performance Comparator

The Trust is not managed to a benchmark, however, the Manager uses the MSCI AC Asia ex Japan (Total Net Return) Index to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of large and medium sized companies from developed and emerging Asian countries.

How the Trust is Managed

At Barings, our equity investment teams share the philosophy of quality "Growth at a Reasonable Price" (GARP). We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth, upside, and ESG considerations can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises both growth and quality criterion when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models. We value companies on a long-term basis utilizing proprietary valuation models that incorporate ESG analysis and macro considerations.

Risk Profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Regional Trusts have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
 will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
 rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative
 as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Report of the Investment Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings Eastern Trust ("the Trust") produced an absolute net return for Class A GBP Acc of 19.51% compared with a return of 17.89% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A GBP Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Eastern Trust	19.51%	58.25%	13.75%	20.47%
MSCI AC Asia ex Japan (Total Net Return) Index	17.89%	29.94%	9.01%	17.07%

The Trust extended the uptrend through the second half of 2020 and continued to deliver strong returns on both absolute and relative basis for the period under review as well as over the longer period of one, three and five years. This strong performance, we believe, was a result of strong stock selection, guided by our bottom-up investment process focusing on long-term fundamentals. Over the 6 months period of this report, Asian equities continued to build on the positive momentum created by the hopes of accelerated economic recoveries with COVID-19 vaccines rollout alongside continued fiscal and monetary stimulus and receding geopolitical tensions between the US and China. Having said that, volatility set in towards the end of February 2021 as interest rates started to move up as a response to inflation risks. Commodities have also moved up substantially, indicating risk of inflation in 2021. We have also seen a bit of market rotation between growth and value globally, with some profit taking in growth proxies of 2020 such as technology, e-commerce and health care names here in Asia.

On a stock level, newly listed Chinese company Kuaishou Technology ended the 6-month period as a notable contributor to the Trust. This is China's second largest short video platform in terms of users. Its robust long-term growth outlook is underpinned by increasing usage in a competitive environment and huge potential from e-commerce livestreaming and online ads. Another Chinese company, construction machinery supplier, Sany Heavy Industry, was also a standout with positive contributions, thanks to the strong increase of excavator sales volume in China, coupled with structural growth drivers including tighter environmental regulations and increasing construction machinery demands overseas, which also contribute to promising growth outlook for the company. ASEAN's leading game developer and e-commerce marketplace SEA also had strong contribution, supported by resilient gamer growth outlook alongside accelerating monetization in the e-commerce business. In contrast, China-based Offcn Education Technology was a key detractor from relative performance, largely due to profit taking pressure and the near-term slowdown of recruitment of teachers. The lack of exposure to NIO, a Chinese electric vehicle (EV) manufacturer, was another performance drag, as the share price rallied on the strong beat of quarterly earnings and improving operations of the company.

In terms of trade activities, key additions during the past 6 months included purchases of Kia Motors, a Korean automotive manufacturer whose electric vehicle capability was yet to be fully valued by the market, and Shenzhen Inovance Technology, as we liked its strong growth outlook driven by its exposure to factory automation. We also increased holding in POSCO, the leading Korean steel manufacturer that is benefiting from improving steel demand as global unlock and economic activities recover. Furthermore, we added positions in AIA and Sands China on the positive recovery outlook post the pandemic. On the other hand, we took partial profits from selective names in North Asia that have registered stellar performance in 2020, including Alibaba Group, Taiwan Semiconductor Manufacturing and China Tourism Duty Free. We also exited position in NetEase to diversify portfolio away from digital/technology concentration.

Report of the Investment Manager (continued)

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
AIA	3,247	Alibaba Group	3,870
Sands China	2,436	Taiwan Semiconductor Manufacturing	2,622
Kia Motors	2,422	Xiaomi	1,847
Shenzhen Inovance Technology	2,315	CP ALL	1,795
POSCO	2,090	LG Household & Health Care	1,712
Nari Technology	2,073	Ping An Insurance Group of China	1,698
IndiaMART InterMESH	2,047	China Tourism Duty Free	1,685
NAVER	1,987	NetEase	1,668
China Construction Bank	1,979	Hindustan Unilever	1,636
Yidu Tech Incorporated	1,916	China Resources Cement	1,561

Market Outlook

We believe that the economic recovery will accelerate throughout 2021 as COVID-19 vaccination picks up globally. Fiscal and monetary policies are expected to remain largely accommodative in 2021. We also believe that inflation risk will be one of the biggest challenges for 2021 but given the strong growth, slightly higher inflation can be absorbed well. In the near-term, market will remain volatile until bond yields settle down. The pace of change has surprised many and equity market reaction is completely understandable in that context. Meanwhile, we expect the US Federal Reserve to remain dovish to fortify the economic recovery in 2021 despite inflation concerns. In the Asian region, economic recovery will broaden beyond North Asia to the more "COVID-19 challenged" countries such as ASEAN and India over the course the year, leading to strong earnings growth rebounds across the region. Structural reforms implemented by Asian countries during the pandemic should ensure that growth momentum sustains even beyond simple bounce back from 2020 lows.

2020 was a unique year in many ways. Global pandemic, response across the economies and behavioral changes across nations distinctly separated winners and losers in the corporate world. It accelerated technology adoption in every sphere of life. As the world slowly comes out of the pandemic, corporates will be forced to think about more sustainable ways of doing business. We expect businesses to build more resiliency in every aspect of its operations, ranging from supply chain, manufacturing systems to business strategies, for them to get more prepared for any sudden shocks like COVID-19. Clearly, 2020 will be remembered as one of the defining years and the trends set in such a year are never short lived. We continue to believe in the beneficiaries of secular growth trends such as technological ubiquity (digitalization and connectivity of everything), evolving lifestyle and societal values (sustainability, consumption upgrade trends, healthy living) and de-globalization (supply chain diversification and reshoring). We will continue to back our conviction in these themes despite strong performance in 2020 and will look for opportunities to strengthen our positions on any correction. At the same time, we do acknowledge that the current global economic recovery has improved growth prospects beyond the abovementioned structural growth sectors, to sectors such as materials/commodities thereby broadening the opportunity set for us in our portfolio construction.

Baring Asset Management (Asia) Limited, appointed as Sub-Investment Manager by Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Directors' Statement

The financial statements on pages 24 and 25 were approved by Baring Fund Managers Limited (the "Manager") and signed on its behalf by:

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

With effect from 10 March 2021, the Trust has been brought into scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") and can be categorised as a "Light Green" environmental, social and governance ("ESG") product. The Trust will invest at least 50% of the Trust's total assets in equities of companies that exhibit positive or improving ESG characteristics.

Subsequent to the period end, the price per unit of the A GBP Accumulation class has increased from 1,660.00p to 1,672.00p, A GBP Income class from 1,616.00p to 1,627.00p, A USD Accumulation class from 2,307.00c to 2,317.00c, D GBP Income class from 1,668.00p to 1,682.00p, I GBP Accumulation class from 1,744.00p to 1,758.00p and I GBP Income class from 1,665.00p to 1,679.00p as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

Investment Objective and Policy and Trust at a Glance

Investment Objective and Policy

The investment objective of Barings European Growth Trust (the "Trust") is to achieve capital growth by investing in Europe excluding the United Kingdom.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in Europe excluding the United Kingdom, or quoted or traded on the stock exchanges in Europe excluding the United Kingdom.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Europe (including in the United Kingdom) as well as in fixed income and cash.

In order to implement the investment policy, the Trust may gain indirect exposure through American Depositary Receipts, Global Depositary Receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

Performance Comparator

The Trust is not managed to a benchmark, however the Manager uses the MSCI Europe ex UK (Total Net Return) Index to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of large and medium sized companies from developed and emerging European countries excluding the UK.

How the Trust is Managed

At Barings, our equity investment teams share the philosophy of quality "Growth at a Reasonable Price" (GARP). We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth, upside, and ESG considerations can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises both growth and quality criterion when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models. We value companies on a long term-term basis utilizing proprietary valuation models that incorporate ESG analysis and macro considerations.

Risk Profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- The Trust can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
 will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
 rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative
 as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Investment Objective and Policy and Trust at a Glance (continued)

Please refer to the Prospectus for the full risk profile.

The Trust at a Glance on 28 February 2021

Total Trust size: 28 February 2021		£58.93million
Total Trust size: 31 August 2020		£58.32 million
OCF*	28/02/2021	31/08/2020
Class A GBP Inc	1.67%	1.60%
Class I GBP Inc	0.92%	0.85%
	Initial charge	Annual charge
Class A GBP Inc	up to 5.00%	1.50%

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

^{**}High/low prices included in the table above are for the accounting period from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period 1 May 2018 to 31 August 2019, respectively.

Report of the Investment Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings European Growth Trust (the "Trust") produced an absolute net return for Class A GBP Inc of 6.53% compared with a return of 7.49% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A GBP Inc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings European Growth Trust	6.53%	11.79%	(0.50)%	8.25%
MSCI Europe ex UK (Total Net Return) Index	7.49%	13.20%	5.00%	10.19%

Underperformance over the longer term was driven largely by a sharp correction in European equities in 2018, which saw defensive sectors in Europe outperform as investors sought refuge from market uncertainty and heightened volatility. This rotation into defensive sectors prompted significant underperformance in the Trust, which had a much lower weighting in companies within these sectors, such as Utilities, Telecommunications, compared to the performance comparator. Prior to this, the Trust had consistently delivered outperformance against the Benchmark over the three- and five-year periods since 2013.

Additionally, there was a change in fund manager in early 2020, which we are expecting will have a positive effect on Trust performance. The new fund managers have undertaken a full review of the portfolio and have made key changes to emphasise the Trust's strategy of bottom-up stock selection as the most important driver of relative returns.

Over the period, stock selection enhanced relative returns whilst sector allocation detracted. Our exposure to the Information Technology sector, where we held more than the performance comparator, contributed positively, whilst having lower exposures than the performance comparator to the Consumer Discretionary and Financials sectors detracted from relative performance.

At an individual stock level, the Trust benefitted from the strong performance of a number of positions across multiple sectors – a characteristic we are pleased to report given our focus on bottom-up stock selection. In this respect, tyre manufacturer Michelin, industrials group Schneider, wealth manager Julius Baer, oil & gas entity Royal Dutch Shell, technology stocks Adyen and ASML, and materials group Boliden all contributed positively to performance.

In contrast, two of our holdings in the Consumer Staples sectors, Nestle and Unilever, both detracted from relative performance. Operationally, both of these companies performed well over the period, and we thus attribute their share price weaknesses to investors favouring other segments of the market that had underperformed throughout the earlier stages of the pandemic. Elsewhere, pharmaceutical group Roche underperformed, caused in part by a third quarter update that was slightly below market expectations.

Transactions over the period included the sale of the remaining stake in Airbus following a strong recovery in the share price over the previous months, and the acquisition of two industrials stocks, namely Assa Abloy, which provides locks and entrance systems, and Schindler, an elevator and escalator manufacturer. Both companies hold strong market positions, with a global reach, and a relatively high degree of more recurring service revenues that we believe will recover strongly in a post-COVID-19 world.

Report of the Investment Manager (continued)

The top purchases and top ten sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
Assa Abloy	1,387	Airbus	2,187
Prysmian	1,339	Rheinmetall	1,325
Schindler	928	Cembra Money Bank	1,111
Koninklijke DSM	925	TGS-NOPEC Geophysical Company	930
Novartis	850	Amadeus IT	910

Temenos	411	ASML	810
Telenet	311	AXA	725
Linde	308	Unibail-Rodamco Reits	679
		CRH	588

Market Outlook

Investor sentiment has improved dramatically over the past few months on hopes that a quick roll-out of vaccinations will spur a commensurately quick return to a pre-COVID-19 world. Perhaps even more so than in equity markets, this recovery is currently being reflected in the rising yields we are seeing across bond markets. This impacts both overall equity markets and individual stocks, as they respond differently to the prospects of inflation and economic recovery. Therefore, this is a situation we as fund managers need to monitor closely.

The next phase of the stock market cycle could be one of "rotation", where stocks that typically perform strongly in an environment where all companies are performing well, do better than the market average, and stocks that exhibit strong characteristics across the cycle find themselves out of favour, due to relatively less attractive short-term earnings expectations.

Furthermore, this rotation has the potential to be exacerbated by the extremes in performance between companies operating in a COVID-19 and post-COVID-19 world compared to 2020. Despite this potential change in short term market leadership, the fund's strategy will remain centred around investing in good quality stocks that we believe will prosper over the long term. On this note, we are confident we will be able to find opportunities to invest in such stocks that the market is overlooking in favour of more short term "COVID-19 recovery" names, and consequently, will be able to invest at more attractive valuations than in the past.

Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Directors' Statement

The financial statements on pages 34 and 35 were approved by Baring Fund Managers Limited (the "Manager") and signed on its behalf by:

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

With effect from 10 March 2021, the Trust has been brought into scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") and can be categorised as a "Light Green" environmental, social and governance ("ESG") product. The Trust will invest at least 50% of the Trust's total assets in equities of companies that exhibit positive or improving ESG characteristics.

Subsequent to the period end, the price per unit of the A GBP Income class has increased from 1,423.00p to 1,543.00p and I GBP Income class from 1,433.00p to 1,556.00p as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

Barings Europe Select Trust

Investment Objective and Policy and Trust at a Glance

Investment Objective and Policy

The investment objective of Barings Europe Select Trust (the "Trust") is to achieve capital growth by investing in Europe excluding the United Kingdom.

The Trust will seek to achieve its investment objective by investing at least 75% of its total assets directly and indirectly in equities and equity-related securities of smaller companies incorporated in, or exercising the predominant part of their economic activity in Europe excluding the United Kingdom, or quoted or traded on the stock exchanges in Europe excluding the United Kingdom.

Smaller European companies can be defined as those companies which are constituents of the bottom 30% of total market capitalisation of Europe's listed companies (this excludes companies in the United Kingdom).

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Europe (including in the United Kingdom), as well as in larger companies, and in fixed income and cash.

In order to implement the investment policy, the Trust may gain indirect exposure through American depositary receipts, global depositary receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

Performance Comparator

The Trust is not managed to a benchmark, however the Manager uses the EMIX Smaller European Companies Ex UK (Total Gross Return) Index to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of small and medium sized companies from developed European countries excluding the UK.

How the Trust is Managed

At Barings, our equity investment teams share the philosophy of quality "Growth at a Reasonable Price" or GARP. We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth and upside disciplines can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises quality criteria when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models. We value companies on a long term-term basis utilizing proprietary valuation models that incorporate ESG analysis and macro considerations.

Risk Profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- The Trust can hold smaller company shares, which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Regional Funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
 will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
 rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative,
 as a relatively small movement may have a larger impact on derivatives than the underlying assets. Some
 derivative transactions may be entered into directly with an eligible person or institution (a "counterparty"). There
 is a risk that the counterparty may not meet its obligations or becomes insolvent, which could cause the Trust to
 incur a loss.

Investment Objective and Policy and Trust at a Glance (continued)

Risk Profile (continued)

- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Losses may occur if an organization through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

^{**}High/low prices included in the table above for the current accounting period are from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period from 1 June 2018 to 31 August 2019, respectively.

[^]Unit class was launched on 30 October 2020.

^{**}High/low prices included in the table above for the current accounting period are from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period from 1 June 2018 to 31 August 2019, respectively.

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

Report of the Investment Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings Europe Select Trust ("the Trust") produced an absolute net return for Class A GBP Inc of 9.75% compared with a return of 17.68% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A GBP Inc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Europe Select Trust	9.75%	18.91%	6.08%	11.86%
EMIX Smaller European Companies Ex UK (Total Net Return) Index	17.68%	28.94%	8.01%	14.63%

Over the longer term, on an annualised basis, the Trust has delivered absolute returns of 6.08% over three years and 11.86% over five, but lagged relative to the performance comparator, owing to the more recent short-term underperformance.

Recent relative underperformance, which has impacted longer-term numbers, has been driven in part by a recovery in the share prices of companies exposed to the Travel and Leisure sectors, such as Airlines, Airports and Cruise operators. These are companies not owned in the portfolio, owing to their continued very weak profitability and uncertain business outlooks. Our focus on companies that are improving the quality of their earnings and business models, while helping our relative performance during the market downturn experienced earlier in 2020, meant that our portfolio did not participate as meaningfully in the recent short-term market rally.

Over the period, we sold out of a number of longer term portfolio holdings, particularly in the IT and Healthcare sectors, which had performed strongly in the earlier months of 2020. For example, we sold shares in computer equipment manufacturer Logitech International following strong performance and took profits in Infrastrutture Wireless Italiane, the Italian telecommunications towers services group, as the share price achieved our price target. In the Healthcare sector, we sold shares in Ontex, the Belgian manufacturer of personal hygiene products, as progress towards repositioning the business has been slower than hoped and exited out of our position in Swiss pharmacy and healthcare wholesaling group Galenica.

We made new investments in areas such as Media sector companies, Industrial engineering groups and in fast-growing internet platforms. These included German broadcaster ProSiebenSat.1 Media, as their online assets have performed strongly, and advertising group Publicis, which has a strong track record of execution and is well positioned relative to peers due to recent restructuring and effective strategic decision-making. We also invested in Metso Outotec, the Finish mining equipment provider, for its leading position in machinery exposed to minerals with supportive outlooks and potential to expand margins.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
Metso Outotec	16,743	Logitech International	24,709
Aalberts Industries	16,224	Infrastrutture Wireless Italiane	23,248
Temenos	15,565	Vopak	22,357
Cie Plastic Omnium	15,115	Tryg	20,069
ProSiebenSat.1 Media	14,078	Korian	19,244
Publicis Groupe	13,170	Worldline	19,236
Elis	12,711	Moncler	18,787
Cargotec	12,571	GN Store Nord	16,973
Hexpol	12,345	Kingspan	15,711
Shop Apotheke Europe	11,980	Enagas	15,292

Report of the Investment Manager (continued)

Market Outlook

European smaller companies, and global equity markets, have weathered a volatile year with remarkable resilience. As we move into 2021, equity markets have continued to extend their recovery from the lows of last year, reflecting optimism that this year will see a strong recovery in economic activity worldwide. Economists predict around 4.10% global GDP growth in 2021, against an easy comparison base. Trade is forecast to recover while corporate fixed asset investment and private consumption are seen as likely to rebound on pent-up demand and falling unemployment rates. Strong money supply growth, low interest rates and supportive short-term furlough and taxation policies have ensured bond yields remained low, while helping more indebted companies to weather the current environment.

On a number of measures, however, European Smaller Companies' valuations are now very much at the higher end of their historic ranges. As a result, individual companies' share price performances are likely to reflect changing assessments of their potential for earnings growth in 2021 and beyond. With rising raw materials prices, a stronger Euro and the disappointing pace of vaccination roll-out in much of Europe, the recovery in European smaller companies' profits in 2021 is likely to lag behind some of the more optimistic forecasts.

In this context, we continue to follow our quality Growth at a Reasonable Price investment approach. Our aim remains to identify attractively valued investment opportunities in companies whose strategic positioning and competitive strengths can drive sustained improvements in their profitability and returns. Given the trends outlined above we anticipate that earnings revisions will be a more reliable guide to share price performance in 2021 than has been the case in 2020, with opportunities for stock selection more widespread among companies, sectors and styles given the valuation backdrop.

Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Total liabilities	(11,141)	(22,132)
Net assets attributable to unitholders	1,257,006	1,390,778

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

With effect from 10 March 2021, the Trust has been brought into scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") and can be categorised as a "Light Green" environmental, social and governance ("ESG") product. The Trust will invest at least 50% of the Trust's total assets in equities of companies that exhibit positive or improving ESG characteristics.

Subsequent to the period end, the price per unit of the A GBP Income class has increased from 4,741.00p to 5,185.00p, A EUR Accumulation class from 5,813.00c to 6,367.00c, A EUR Income class from 5,450.00c to 5,969.00c, A USD Accumulation class from 7,023.00c to 7,662.00c, I GBP Accumulation class from 115.50p to 126.60p, I GBP Income class from 4,761.00p to 5,208.00p, I EUR Accumulation class from 5,899.00c to 6,468.00c and I EUR Income class from 5,478.00c to 6,001.00c as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

^{*} Unit class was launched 30 October 2020.

Investment Objective and Policy and Trust at a Glance

Investment Objective and Policy

The investment objective of Barings German Growth Trust (the "Trust") is to achieve capital growth by investing in Germany.

The Trust will seek to achieve its investment objective by investing at least 75% of its total assets directly and indirectly in equities and equity related securities of companies incorporated in, or exercising the predominant part of their economic activity in Germany, or quoted or traded on the stock exchanges in Germany.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity related securities outside of Germany as well as in fixed income and cash.

In order to implement the investment policy, the Trust may gain exposure through American Depositary Receipts, Global Depositary Receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

Performance Comparator

The Trust is not managed to a benchmark, however the Manager uses the HDAX® (Total Return) Index to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of the stock market index in Germany.

How the Trust is Managed

At Barings, our equity investment teams share the philosophy of quality "Growth at a Reasonable Price" (GARP). We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth, upside, and ESG considerations can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises both growth and quality criterion when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models. We value companies on a long term-term basis utilizing proprietary valuation models that incorporate ESG analysis and macro considerations.

Risk Profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Country-specific funds have a narrower focus than those which invest broadly across markets and are therefore
 considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
 will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
 rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative
 as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a
 transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated
 derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an
 advantageous time or price.

Please refer to the Prospectus for the full risk profile.

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

^{**}High/low prices included in the table above for the current accounting period are from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period from 16 May 2018 to 31 August 2019, respectively.

Report of the Investment Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings German Growth Trust ("the Trust") produced an absolute net return for Class A EUR Acc of 15.45% compared with a return of 7.58% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A EUR Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings German Growth Trust	15.45%	16.34%	(0.94)%	5.94%
HDAX® (Total Return) Index	7.58%	15.89%	3.95%	8.47%

Outperformance of the Trust over the short-term has been driven entirely by stock selection, with our positioning in the Information Technology sector adding close to 3.5% in relative performance, and our exposures to the Health Care, Industrials and Materials sectors all contributing over 1% each. Despite this overall strong performance, the market backdrop was volatile at points, with German equities (as measured by the HDAX index) falling approximately 10% in the first two months of the period before rebounding strongly in November in response to positive news regarding COVID-19 vaccines. Stock prices continued to rally throughout the remainder of the period, generating a new all-time high for the HDAX in the process.

Long-term numbers are primarily a reflection of poor relative performance in the earlier stages of 2020, as the COVID-19 pandemic took hold, and relative weakness in the latter stages of 2018, when German large cap equities outperformed small cap, reflecting generally negative investor sentiment towards equity markets rather than stock-specific factors. At the time, the Trust's exposure to smaller cap names proved to be a significant headwind in this environment, and was the principle reason for the fund significantly underperforming its benchmark in 2018.

At a sector level, Semiconductors and IT Hardware were particularly strong, alongside the traditionally cyclical sectors of Industrials and Consumer Discretionary. Of the stocks held in the fund, strong performance came from Allgeier and its spin-off Nagarro in the IT sector. Semiconductor wafer manufacturer Siltronic was another outperformer, as Global Wafers bid for the company at a significant premium. Thirdly was Ibu-Tec Advanced Materials which will benefit from the transition to electric vehicles.

Partially offsetting this, in the Information Technology sector S&T and Cancom both underperformed. Elsewhere, Hannover Reinsurance and nutritional supplement company PharmaSGP also lagged the Index and detracted from relative returns.

Portfolio activity remained relatively low over the period. Towards the end of 2020, we sold a significant part of our holding in Allianz, which had outperformed, to finance a switch in insurance sector exposure from primary insurance into the re-insurance market. This was achieved through purchases in Hannover Reinsurance and Muenchener Rueckversicherungs-Gesellschaftin. Then, towards the end of the accounting period, bond yields rose dramatically and cyclical equities rallied. Therefore, it made sense to take profits in some cyclical stocks and recycle these back into more defensive names, such as Allianz, which had also underperformed by approximately 10% since the sale at the end of 2020.

Other stocks purchased were largely in the renewable energy sector, such as Siemens Gamesa, ABO Wind and 7C Solarparken. Airbus was the most significant sale, as the stock exceeded our target price. Other positions sold included Compugroup Medical, which reached our price target, and Fresenius Medical Care, whose business has been impacted by a reduction in their dialysis patient population due to COVID-19. This we believe is likely to have a longer lasting impact on the company, even after the pandemic.

Report of the Investment Manager (continued)

The top ten purchases and sales during the period were as follows:

Purchases	Costs €'000	Sales	Proceeds €'000
BASF	12,762	Airbus	21,168
Hannover Reinsurance	11,852	Deutsche Post	10,817
Daimler	10,061	Hochtief	9,254
Muenchener Rueckversicherungs-		Fresenius Medical Care	8,965
Gesellschaftin	9,783	Rheinmetall	7,669
Covestro	3,022	Allianz	5,999
Allianz	2,567	Lanxess	4,943
Linde	1,926	SAP	4,746
LafargeHolcim	1,614	Volkswagen	3,626
ADVA Optical Networking	1,040	CompuGroup Medical	3,525
ABO Wind	1,031	Compacioup Modical	0,020

Market Outlook

Given the strong performance of stock prices since the end of October, we would expect more modest movements over the coming months, particularly as news flow regarding the reopening of economies begins to wane. This will likely be balanced by the potential for increased COVID-19 infection rates, as the UK variant begins to take hold in Europe at a time when few people on the continent have been vaccinated.

In this environment, companies more dependent on the normalization of economic activity (e.g. retailers), will probably prove to have more volatile share prices, whilst many companies in the traditional industrial sectors, which have successfully overcome the limitations, are likely to continue to perform well.

Looking further ahead, vaccination rates will continue to increase, and as long as the current vaccines remain effective against the various mutations of COVID-19, we would expect a reopening of the economy over the summer months. This should allow for the positive market progression to continue into the second half of the year, as companies report strong earnings progression following a gradual normalization of economic activity. There is still a risk however, that COVID-19 mutates in a way that proves to be resistant against the current set of vaccines, and therefore we do not expect any particularly strong market advances in the realms of a double-digit gain by the end of summer.

In this context, we continue to follow our quality Growth at a Reasonable Price investment approach. Our aim remains to identify attractively valued investment opportunities in companies whose strategic positioning and competitive strengths can drive sustained improvements in their profitability and returns.

Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Directors' Statement

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

Subsequent to the period end, the price per unit of the A EUR Accumulation class has increased from 1,008.00c to 1,100.00c, A GBP Accumulation class from 875.30p to 954.10p, A GBP Income class from 785.50p to 856.20p, A EUR Income class from 900.10c to 982.50c, A USD Accumulation class from 1,219.00c to 1,325.00c, A USD Hedged Accumulation class from 1,214.00c to 1,328.00c, A RMB Hedged Accumulation class from RMB 82.99 to RMB 91.09, I GBP Accumulation class from 929.30p to 1,015.00p, I GBP Income class from 782.90p to 854.40p, I GPB Hedged Accumulation class from 939.80p to 1,029.00p, I EUR Accumulation class from 1,070.00c to 1,169.00c, I EUR Income class from 880.30c to 962.00c and I USD Accumulation class from 1,280.00c to 1,394.00c as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

Investment Objective and Policy and Trust at a Glance

Investment Objective and Policy

The investment objective of Barings Japan Growth Trust (the "Trust") is to achieve capital growth by investing in Japan.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in Japan, or quoted or traded on the stock exchanges in Japan.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Japan as well as in fixed-income and cash.

In order to implement the investment policy, the Trust may gain exposure through American Depositary Receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

Performance Comparator

The Trust is not managed to a benchmark, however the Manager uses the Japan (TSE) First Section (Total Net Return) Index to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of the largest companies in the Japanese stock market.

How the Trust is Managed

At Barings, our equity investment teams share the philosophy of quality "Growth at a Reasonable Price" (GARP). We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth, upside, and ESG considerations can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises both growth and quality criterion when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models. We value companies on a long term-term basis utilizing proprietary valuation models that incorporate ESG analysis and macro considerations.

Risk Profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Country-specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- The Trust can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
 will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
 rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative
 as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a
 transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated
 derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an
 advantageous time or price.

Please refer to the Prospectus for the full risk profile.

Investment Objective and Policy and Trust at a Glance (continued)

The Trust at a Glance on 28 February 2021

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

^{**}High/low prices included in the table above are for the accounting period from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period from 1 February 2019 to 31 August 2019, respectively.

Report of the Investement Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings Japan Growth Trust ("the Trust") produced an absolute net return for Class A GBP Acc of 9.55% compared with a return of 10.08% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A GBP Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Japan Growth Trust	9.55%	27.86%	6.48%	13.69%
Japan (TSE) First Section (Total Net Return) Index	10.08%	16.73%	3.71%	11.16%

Global equity markets enjoyed a strong gain during the reporting period as hopes for a medical solution to the pandemic grew with a rollout of vaccination, and accommodating fiscal policy was maintained within major economies. In September, Japan's longest serving Prime Minister, Abe, resigned, however the change in government had little impact on the Japanese Equity market as a close ally of Abe, Yoshihide Suga was appointed as the new Prime Minister. The Topix index ended the interim reporting period 10.8% higher at 1864.5 and the yen weakened by 5.5% versus sterling over the period. During the period, the portfolio performed largely in line with the comparator, gaining 10.5% gross return. Performance over the year remains very strong and on longer term horizons the fund continues to compare well to the performance comparator and the peer group. Our bottom up investment process based on 5-year earnings approach has enabled us to focus more on inherent earnings quality and the intrinsic valuation of stocks rather than short-term earnings and valuation volatility, and such an approach helped us to achieve a consistent market beating performance.

During the reporting period, the portfolio benefitted significantly from strong performance of post COVID-19 winners such as technology and automation related plays but was impacted by some weakness in consumer facing sectors, particularly in retail and transport. At the stock level, we saw strong contribution from Toyota Industries (global top 3 logistic automation) and Tokyo Electron (leading semiconductor production equipment manufacturer), as well as IT cloud service providers, such as Insource (HR training platform) and WealthNavi (Online wealth management platform). The main detractors from the performance were Seria (Y100 store operator) and Cosmos Pharmaceutical (leading drug store operator), both with strong business franchises but misunderstood as COVID-19 temporary winners by investors. While very few stocks contributed negatively to absolute return of the portfolio, the portfolio lost some relative performance due to its relatively small exposure to low quality cyclical stocks, which enjoyed a sharp rebound in an early part of 2021.

Outside normal portfolio adjustment activities, we exited several long held but increasingly expensive growth stocks, such as Terumo, Daifuku, Nissan Chemical, Nitori and Recruit during the reporting period. At the same time, we introduced several stocks to the portfolio, which are yet to be discovered by wider investors but will benefit from post COVID-19 business environment, such as Temairazu (Online hotel booking aggregator), Nippon Gas (Largest LPG supplier in Japan) and CKD (automation component producer).

Report of the Investement Manager (continued)

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
Nippon Gas	580	KDDI	493
Temairazu	532	Pigeon	486
CKD	418	Terumo	454
Justsystems	410	Takeda Pharmaceutical	351
MCJ	397	Recruit	334
Yakult Honsha	382	Sakai Moving Service	325
Toyota Motor	350	Tokyo Electron	323
Daiichi Sankyo	292	Shimadzu	303
Kurita Water Industries	166	Daifuku	301
Murata Manufacturing	165	Koito Manufacturing	298

Market Outlook

After a strong gain last year, the key risk to the equity market as we exit the pandemic is that the pace of demands recovery falls behind current market expectation. Recent resilient corporate earnings season and encouraging macro data meant that the equity market has been increasingly pricing in a strong recovery on pent up demands from the second half of 2020. Growing inflation concerns and rise in long-term rates could also pose risks to equity valuations, particularly for growth stocks.

Despite the challenge in the market, recently reported quarterly earnings and subsequent share price movements provide us with an assurance that our focus on identifying companies with strong business model and high caliber management will continue to work well during market volatility. Companies with solid business models and proactive management retain better chances of reporting consensus beating earnings and delivering subsequent outperformance during challenging economic conditions. More importantly, we see many of those quality companies adapting more effectively to the post COVID-19 business environment and forging stronger market position.

Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

With effect from 10 March 2021, the Trust has been brought into scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") and can be categorised as a "Light Green" environmental, social and governance ("ESG") product. The Trust will invest at least 50% of the Trust's total assets in equities of companies that exhibit positive or improving ESG characteristics.

Subsequent to the period end, the price per unit of the A GBP Accumulation class has increased from 259.30p to 273.20p, I GBP Accumulation class from 272.30p to 287.30p and I GBP Income class from 259.60p to 273.90p as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

Investment Objective and Policy and Fund at a Glance

Investment Objective and Policy

The investment objective of Barings Strategic Bond Fund (the "Fund") is to achieve capital growth together with income by investing globally.

The Fund will seek to achieve its investment objective by investing directly and indirectly in fixed income securities globally, as well as cash, near cash and money market instruments.

The Fund may invest directly and indirectly in investment grade, sub-investment grade and unrated bonds issued by governments, sovereigns, supranationals and corporates in developed and emerging markets. The Investment Manager has the ability to invest directly or indirectly in debt securities of any maturity, duration or credit rating (including unrated).

In order to implement the investment policy, the Fund may gain indirect exposure through investments in collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also obtain indirect exposure through derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management and for investment purposes. Forward currency transactions will be used to gain exposure to currencies and may be used to manage currency risk when considered appropriate.

Please refer to the Prospectus for the full investment objective and policy.

Performance Assessment

The Fund is not managed to a benchmark, nor does the Manager use a benchmark in assessing the Fund's performance, Investors may however refer to the information in Morningstar's Global Bond Category, which presents data for a range of funds (including the Fund) which are grouped according to investment style, including performance information, and which enables investors to compare information across products.

How the Fund is Managed

The Fund invests in corporate and government bond markets where it is believed that yields are likely to fall (and prices are likely to rise). It also avoids those which are evaluated as expensive, and where returns are likely to be negative in the medium term. The overall duration or interest rate sensitivity of the Fund will fluctuate as expectations for economic developments change, relative to the market. The Manager will also look to add value through foreign exchange management, identifying those markets where currencies are attractive, for example, due to sound economic fundamentals or rising interest rates.

Risk Profile

Please see detailed below the key risks applicable to the Fund:

- There is no guarantee that a bond issuer will pay the interest due or repay the loan. Bond values are likely to fall if interest rates rise.
- Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell fund
 investments at an anticipated price or in a timely manner. This could have a negative impact on the value of your
 investment. In extreme conditions, this could affect the Fund's ability to meet investors' redemption requests.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a
 transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated
 derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an
 advantageous time or price.

Please refer to the Prospectus for the full risk profile.

Investment Objective and Policy and Fund at a Glance (continued)

The Fund at a Glance on 28 February 2021

Total Fund size: 28 February 2021		£32.88 million
Total Fund size: 31 August 2020		£31.92 million

Prices**						
Highest unit price	122.30	127.30	122.50	122.70	127.80	123.20
Lowest unit price	109.60	93.44	112.00	109.80	93.67	112.90

^{*}Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Fund and unit class returns before operating charges.

^{**}High/low prices included in the table above for the current accounting period are from 1 September 2020 to 28 February 2021. For previous periods, they relate to the accounting year from 1 September 2019 to 31 August 2020 and accounting period from 13 July 2018 to 31 August 2019, respectively.

Report of the Investment Manager

Performance

During the reporting period from 1 September 2020 to 28 February 2021, the Barings Strategic Bond Fund (the "Fund") produced an absolute net return for Class A GBP Inc of 9.55% compared with a return of 0.25% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year annualised net return for the Class A GBP Inc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Strategic Bond Fund	9.55%	2.05%	2.85%	2.40%
Morningstar Global Bond Category	0.25%	4.75%	3.02%	3.06%

As highlighted in the annual report for the year ended 31 August 2020, the Fund was negatively impacted by COVID-19, but fully recovered all post COVID-19 losses and has closed calendar year 2020 in positive territory. Performance continued to improve with economically sensitive assets rebounding from the COVID-19 hit. This was in line with our global macro-economic base case scenario.

Specifically, over the current reporting period, the Fund had returned 9.55% vs negative return of (6.05%) for the reporting period ended 31 August 2020. This translates to a return of 2.05% on a 1 year horizon, 2.85% on a 3 year horizon and 2.40% on a 5 year horizon. The Investment Managers continue to have high conviction in their asset selection and investment strategy and continue to expect positive Fund returns over the short to medium term.

The Fund distributes income collected semi-annually. This is not a targeted return measure and varies from time to time. The Fund's overall performance is measured on an absolute return basis. The average 1 year and 3 year income distribution for the Class A GBP Inc was 2.86p and 2.56p respectively and for the Class I GBP Inc was 3.55p and 3.30p respectively.

The Fund's positioning remain biased towards risk assets, with long positions in Eurozone peripheral sovereign bonds and spreads, DM credit, EM hard currency bonds and commodity linked currencies (CLCs) such as the Australian Dollar and Chilean Peso. On Brexit, we expected a positive conclusion and therefore raised our GBP exposure through long positions in GBP/USD and selling EUR/GBP FX futures.

There are three notable positioning changes during the current reporting period, namely:

- We continued to actively hedge FX exposure given GBP (base currency) FX volatility on Brexit. This was done
 through currency futures;
- We reduced exposure to Emerging Markets, including exposure to long maturity bonds given the high inherent risks, and overall contribution to portfolio risk; and
- We also reduced exposure to long maturity Italian bonds. Domestic political volatility was dragging down performance, and the outlook on spread compression to Germany remains uncertain.

Report of the Investment Manager (continued)

The top ten purchases and sales during the period were as follows:

Market Outlook

We maintained a positive economic outlook premised on the ongoing strong economic recovery supported by extremely accommodative monetary policy, large global fiscal stimulus programs and encouraging results from the COVID-19 vaccine trials.

Our global economic and market outlook has not changed; recovery expectations remain buoyant premised on:

- Additional rounds of fiscal stimulus in the US and Europe;
- Discovery of COVID-19 vaccine and ongoing mass vaccination programs underway in most major economies;
- Resilient consumption globally, supported by government job support schemes; and
- Monetary policy set to remain loose over the next few years across major economies, thus supporting the recovery in the medium term.

We however acknowledge that asset valuations in most markets have recovered to pre-COVID-19 levels. The recovery is arguably priced-in. The bar for significant positive economic surprises is high, but the stock of stimulus injected into the global economy post COVID-19 and policymakers' bias towards supporting the recovery provides a strong base for the economic recovery continuing into 2022.

Since our base outlook has not changed, the Fund's overall positioning has equally not changed. We are maintaining a pro-risk bias, positioning for sectors that are likely to benefit from the global infrastructure boom.

Baring Asset Management Limited

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

Directors' Statement

The financial statements on pages 87 and 88 were approved by Baring Fund Managers Limited (the "Manager") and signed on its behalf by:

Note to the Financial Statements

for the period ended 28 February 2021

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2020. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

Post balance sheet events

Subsequent to the period end, the price per unit of the A GBP Income class has decreased from 120.50p to 119.60p and I GBP Income class has decreased from 121.10p to 120.00p as at 23 April 2021. This movement takes into account routine transactions. The Manager continues to monitor investment performance in line with investment objectives.

^{*} The Synthetic Risk and Reward Indicator ("SRRI") is not a measure of the risk of capital loss, but a measure of the Trust's price movement over time; the higher the number, the greater the price movement both up and down. It is based on historical data and is not a reliable indication of the future risk profile of the Trust. The risk category shown is in line with the Key Investor Information Document ("KIID") at year-end, is not guaranteed, and may change over time. The risk categories are measured from 1 to 7 (1 measuring typically lower risk/rewards and 7 measuring typically higher risk/rewards). The lowest category does not mean a risk-free investment. The Trust is classified in the category indicated due to past movements in the Trust's price. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest. The SRRI figures shown have not changed during the period.

^{**} The Fund ceased trading on 3 December 2019.

^{***} Share class was launched on 30 October 2020.

Other Important Information

Constitution

The Trusts were constituted by a Trust Deed between Baring Fund Managers Limited ('the Manager") and NatWest Trustee and Depositary Services Limited.

This document has been issued by the Manager, which is authorised by the Financial Conduct Authority.

The Trusts are authorised unit trust schemes as defined in section 243 of the Financial Services and Markets Act 2000 and have been established as Undertakings for Collective Investments in Transferable Securities ("UCITS") schemes.

Performance

Past performance is no indication of current or future performance. Investment involves risk. The value of any investments and any income generated may go down as well as up and is not guaranteed. Any reference in the Investment Manager reports for any of the Trusts should not be read as recommendations to investors to buy or sell the same but are included as illustrations only.

Key changes during the period

The Prospectus of the Trusts was updated on 5 March 2021. The material changes to the Prospectus are outlined as follows:

- Updated disclosures on the United Kingdom's exit from the European Union:
- Inclusion of additional disclosures to bring the Trusts into compliance with Level 1 of the Sustainable Finance Disclosure Regulation ("SFDR").
- The following Trusts have been categorised under Article 6 of the regulation (non-ESG financial products):
 - a. Barings German Growth Trust;
 - b. Barings Strategic Bond Fund;
 - c. Barings Dynamic Capital Growth Fund.
- The following Trusts have been brought into scope of Article 8 of the regulation and can be categorised as "Light Green" ESG products:
 - a. Barings Europe Select Trust;
 - b. Barings Eastern Trust;
 - c. Barings Japan Growth Trust;
 - d. Barings European Growth Trust.

The prospectus include clarifications to the investment policy and strategy of these Trusts.

There are other immaterial changes to the Prospectus that are not listed above.

Effective 1 September 2020, Barings Europe Select Trust re-opened for ongoing subscription by existing and new investors.

Market timing

Repeatedly purchasing and selling units in the Trusts in response to short-term market fluctuations – known as 'market timing' – can disrupt the Manager's investment strategy and increase the Trusts' expenses to the prejudice of all unitholders.

The Trusts are not intended for market timing or excessive trading. To deter these activities, the Manager may refuse to accept an application for units from persons that it reasonably believes are engaged in market timing or are otherwise excessive or potentially disruptive to the Trusts.

The Manager also reserves the right to redeem units which it reasonably believes have been purchased by unitholders engaged in market timing.

Publication of prices

The prices of units are published on the Barings website at www.barings.com. You can also obtain prices by telephone by calling +44 (0) 333 300 0372.

Other Important Information (continued)

Dealing basis

The Manager's basis for dealing in purchases and sales of the Trusts' units is "forward". This means that the price used for any deal will be calculated at the next valuation point following receipt of the investor's instruction.

Fees and expenses

The Manager's periodic charge is calculated on each business day, based on the value of the property of the Trusts on the immediately preceding business day, and is paid to the Manager monthly, in arrears, on the first business day of the calendar month immediately following. The current annual management fees charged to the Trust are shown on pages 5, 15, 27, 37, 52, 68, and 79.

Revenue allocations and reports

Revenue allocations are made on 30 April (interim) and 31 October (final) of each year, where applicable, and forwarded to unitholders together with tax vouchers. The most recent annual report and audited financial statements and interim report and unaudited financial statements will be available on the Baring Asset Management Limited website at www.barings.com.

Prospectus and Manager's reports

Copies of the Prospectus, the Key Investor Information Document(s) ("KIID(s)"), and the most recent annual or interim report and financial statements are available to all persons free of charge from the Manager upon request. PricewaterhouseCoopers LLP (the "Independent Auditor") expresses its opinion on the English version of the annual report and financial statements, and accepts no responsibility for any translations of those financial statements.

Value Assessment

As part of the FCA's Asset Management Market Study, Authorised Fund Managers are now required to produce an annual Value Assessment for all UK authorised funds. The Manager had published the Value Assessment for the Barings funds as part of a broader composite report in the 4th Quarter 2020. This is available on the Barings website at www.barings.com.

Disclosure for Overseas Investors

Special risks resulting from additional German tax publication requirements in Germany

A foreign investment company such as Baring Fund Managers Limited (the "Manager") must provide documentation to the German fiscal authorities upon request, e.g. in order to verify the accuracy of the additional German published tax information. German investors will use this for their tax returns. The basis upon which such figures are calculated is open to interpretation and it cannot be guaranteed that the German fiscal authorities will accept the Manager's calculation methodology in every material respect. In addition, you should be aware that if it transpires that these publications are incorrect, any subsequent correction will, as a general rule, not have retrospective effect and will, as a general rule, only take effect during the current financial year. Consequently, the correction may positively or negatively affect the investors who receive a distribution or an attribution of deemed income distributions in the current financial period.

Information for investors in Switzerland

The Manager has appointed BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland as representative and paying agent for Switzerland. Units are distributed in Switzerland by BNP Paribas (Switzerland) Limited at the above address. Investors can obtain free of charge the Prospectus, KIID(s), the latest annual and interim reports, copies of the Trust Deed (and any amendments thereto) as well as a list of the purchases and sales made on behalf of the Trust, in French, from the representative at the above address. Official publications for the relevant trusts are found on the internet at www.fundinfo.com. Unit prices (Net Asset Value with the words "plus commissions") are published daily on the internet at www.fundinfo.com.

Important information to the performance tables on page 99 to 101

The value of an investment can fall as well as rise as a result of market fluctuations and investors may not get back the amount originally invested. Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units, nor the effect of the Manager's preliminary charge.

In conformity with a Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is providing the below additional information regarding performance.

Total Expense Ratio ("TER")

Following the Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is required to publish a total expense ratio ("TER") for the Trust for the 12 month to 31 August 2020. The TER has been established by the Manager and draws upon the data contained in the "Statement of total return" (Manager's management fee, registration fees, trustee fees, safe custody charges, audit fees, Financial Conduct Authority ("FCA") and other regulatory fees and taxation fees as well as any further fees and costs listed in the "Statement of total return" account which do not form part of the aforementioned categories). It is calculated with reference to these numbers and in conformity with the above guideline.

Disclosure for Overseas Investors (continued)

The TERs for each class for the period ended 28 February 2021 and year ended 31 August 2020 are as follows:

	TER 28/02/2021 %	TER 31/08/2020 %

Trailer fees and reimbursements

Trailer fees (Bestandespflegekommissionen) may only be paid to the sales agents/partners indicated below:

- authorised sales agents (distributors) within the meaning of Article 19, Para 1, Collective Investment Schemes Act ("CISA");
- sales agents (distributors) exempted from the authorisation requirement within the meaning of Article 19, Para 4, CISA;
- sales partners who place fund units exclusively with institutional investors with professional treasury facilities; and/or;
- sales partners who place fund units with their clients exclusively on the basis of a written commission-based asset management mandate.

Reimbursements (Rückvergütungen) may only be paid to the institutional investors detailed below who from a commercial perspective are holding the fund units for third parties:

- life insurance companies (in respect of fund units held for the account of insured persons or to cover obligations towards insured persons), pension funds and other retirement provision institutions (in respect of fund units held for the account of beneficiaries);
- investment foundations (in respect of fund units held for the account of in-house funds);
- · Swiss fund management companies (in respect of fund units held for the account of the funds managed); and
- foreign fund management companies and providers (in respect of fund units held for the account of managed funds and investing unitholders).
