Barings Global Agriculture Fund

The Asset Triple A Awards¹

Asset Management Company of the Year,
Asia—Equity | 2018

BENCHMARK Fund of the Year Awards²

Best-in-Class (Agribusiness Sector Equity)
Top Global Compact (GC) Performance | 2020

Outstanding Achiever (Agribusiness Sector Equity)
Top ESG Performance | 2020

AS OF 29 FEBRUARY 2024

1. The Fund invests primarily in equities and equity-related securities in any company where the majority of earnings of issuers or holding companies are derived from activities related to any commodities which are grown or raised, commonly known as agricultural or soft commodities.
2. The Fund is subject to risks, such as investment, equities and equity related instruments, counterparty, liquidity, currency risks and the risks of investing in small and mid-capitalisation companies.
3. The Fund's investment may be concentrated in the agricultural sector or a single country/region and the value of the Fund may be more volatile. Agricultural and soft commodities markets may be adversely affected by natural events and human errors. Investing in emerging markets may involve increased risks, including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody and volatility risks.
4. The Manager integrates environmental, social and governance (ESG) information into the investment process, which may affect the Fund's investment performance and, as such, may perform differently compared to similar collective investment schemes.
5. The Fund may invest in derivatives for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
6. Investors may suffer substantial loss of their investments in the Fund.

WHY BARINGS GLOBAL AGRICULTURE FUND (THE "FUND")?

1. WELL-RECOGNIZED WITH A STRONG ESG RATING

The Fund, launched in 2009, invests in leading companies across the agriculture sector that have operations throughout the agriculture value chain. The Fund has been well-recognized by the market, with a 3-star Morningstar rating and a strong ESG-rating from MSCI.³

2. POPULATION GROWTH DRIVING NEED FOR FOOD PRODUCTION CAPACITY EXPANSION

Over the longer term, the global population will continue to rise, but the area of farmable cropland remains limited. It is expected that the incremental rise in food production will come from the technological advancement to enhance crop yields. Over the years, food production capacity has dramatically increased through a series of technological innovations across areas including planting, weed management, fertilization, pest controls, and storage and shipping. These yield enhancement initiatives must continue through the remainder of this century in order to fulfill the demand from a growing population, which will ultimately support the investment case for agriculture industries in the medium to long term.

3. FOOD INFLATION REMAINS ELEVATED DUE TO STRUCTURAL DISRUPTIONS

Despite the recent moderation in headline inflation, risk for food-related inflation remains elevated high due to the ongoing Ukraine conflict and climate uncertainties. In 2023, the probability of El Nino reaches close to 100%, which would likely lead to draught and negative impact on crop harvest across Asia. Currently low levels of grain inventories could mean strained supplies in the coming months, which could potentially support fundamentals of companies in the agriculture sector.

Global Population Projections (Billion)⁴

Probability of El Nino in 2023, %⁵

FUND OBJECTIVES⁶

The investment objective of the Fund is to provide a total return, including both capital growth and dividend income (after fees have been deducted), in excess of the DAXglobal® Agribusiness (Total Net Return) Index over a rolling five year period by investing in equity and equity related securities in the agricultural sector.
